~~Worksheet Answers |
akademiexcel.com~~

Acceleration = $\frac{\text{Final speed} - \text{Beginning speed}}{\text{Time}}$ $\frac{V_2 - V_1}{t}$

A positive value for acceleration shows speeding up, and negative value for acceleration shows slowing down.

Read Book Acceleration

Slowing down is also called deceleration.

The acceleration formula can be rearranged to solve for other variables such as final speed (v_2) and time (t).
$$v_2 = v_1 + (a \times t)$$
$$v_2 - v_1 = a \times t$$
$$t = \frac{v_2 - v_1}{a}$$
