The purpose of this manual is to document methodology and to serve as a reference for the laboratory analyst. The standard methods described in this SSIR No. 42, Soil Survey Laboratory Methods Manual, Version 4.0 replaces as a methods reference all earlier versions of the SSIR No. 42 (1989, 1992, and 1996, respectively) and SSIR No. 1, Procedures for Collecting Soil Samples and Methods of Analysis for Soil Survey (1972, 1982, and 1984). All SSL methods are performed with methodologies appropriate for the specific purpose. The SSL SOP's are standard methods, peer-recognized methods, SSL-developed methods, and/or specified methods in soil taxonomy (Soil Survey Staff, 1999). An earlier version of this manual (1996) also served as the primary document from which a companion manual, Soil Survey Laboratory Information Manual (SSIR No. 45, 1995), was developed. The SSIR No. 45 describes in greater detail the application of SSL data. Trade names are used in the manual solely for the purpose of providing specific information. Mention of a trade name does not constitute a guarantee of the product by USDA nor does it imply an endorsement by USDA.

Includes over 75 maps, photos and plans. The present volume describes the activities of the U.S. Army in Vietnam during World War II, military advice and assistance to the French government during the immediate post-war years, and the advisory program that developed after the Geneva Agreements of 1954. Its scope ranges from high-level policy decisions to low-echelon advisory operations in the field, presented against a background of relevant military and political developments. The author enjoyed access to the official records of the period and examined personal papers, interviews, other documentary sources, and miscellaneous published materials. Useful not only as a study of military assistance but as a view of the Army as an agent of national policy, this volume is a fitting introduction to the overall study of the conflict in Vietnam.
