Lukien is the Bronze Knight, beloved by his kingdom and renowned in battle throughout his world. After betraying his king and losing his beloved, he wishes only for death, but rather than die, Lukien is given a chance for redemption: to be the protector of the Inhumans—those fragile mortals who live deep in the desert, far from the prying eyes of their world. These remarkable individuals have been granted magical powers in exchange for the hardships and handicaps life has handed them. And Lukien, now immortal himself, must be their champion. But how can one man, even an immortal warrior, protect hundreds from a world of potential enemies?

S á muel Gyarmathi ' s Affinitas linguae hungaricae cum linguis fennicae originis grammatica demonstrata (G ô ttingen 1799) was received as a distinguished work of scholarship in its own days, and its historical importance has been fully recognized ever since. This volume provides an English translation of the entire Latin text, including the Latin glosses of the original (with the exception of zoological and botanical terms, and a few passages where specific reference is made to Latin grammar). This translation includes two additions to the text of Affinitas as reprinted in the Indiana University series: Appendix III, a letter to Gyarmathi by A. L. von Sch ô tzler, and a number of notes in the author ' s own hand, found in his copy of the work (now held in the Library of the Lyc é e of Zal u). The translator ' s Preface provides an introduction to the work and an overview of Gyarmathi ' s life.

Brother and sister detectives search for a missing husband and father while wrestling with their own family discord. When all is said and done, will they turn up one man short?

The study contains a synchronical description of the San Giorgio variety of the Slovene dialect spoken in the Resia valley (Val Resia/Rezjanska dolina) situated in north-eastern Italy. The following linguistic levels are analysed: phonology, morphonology and morphology. Apart from this some remarks on syntax and a lexicon have been included. The first chapter contains an overview of existing descriptive publications on Resian. Taking this overview as a starting point the choice of exactly the San Giorgio variety as the topic of this study is accounted for and the need for not only phonological, but also morphological analysis is made pointed out. The chapter further contains information on the native speakers whose speech is analysed and on the various methods used to obtain the dialect material. In the second chapter the phoneme inventory is presented, along with information on realisations, (optional) neutralisations and sandhi phenomena. Notwithstanding the considerable amount of phonetic detail given, the first and foremost aim of this chapter remains the quest for phonological oppositions and their functioning. In the third chapter the morphological alternations that occur in the substantive, adjective and verb categories are being treated. Instead of dividing this information over the respective chapters on these categories, the alternations are presented together in a separate chapter, because some of the more frequent of them occur in all these word classes. However, through a classification by accent classes alternations concerning the location of stress are treated together with the word class they occur in. The third through seventh chapter inclusive contain the morphology of the substantive (chapter 4), the adjective (chapter 5), the pronoun, the numeral and the article (chapter 6) and the verb (chapter 7), respectively. In each chapter, together with an inventory of the attested desinences, an overview is given of rare desinences, of irregular declinations/conjugations and of the distribution of alternative desinences.

This volume is a collection of articles on clitic doubling, a phenomenon that has preoccupied generative linguists since the 1980s, when its theoretical importance was noted. Clitic doubling is prevalent in the Balkan languages. However, generative studies initially dealt with its properties in Romance languages, with the Balkan patterns coming increasingly into focus. Since the mid-nineties, these patterns presented a variety of challenges to the generalisations reached on the basis of Romance, while also raising new research questions. The volume deals among other things with the following aspects of the phenomenon: its extension within and outside the Balkan Sprachbund and the observed variation; its realizational possibilities and the constraints on the status of the doubled DP (direct or indirect object, pronominal or non-pronominal); its semantics (definite, specific, presupposed, neither) and pragmatics (topic or not, D-linked or not); its temporal and locational genesis; the relationship between the clitic and its associate.
