to the textbook, Dysphagia Assessment and Treatment Planning, Fourth Edition, by Dr. Rebecca Leonard and Dr. Katherine Kendall. The fourth edition of the textbook is ideal for dysphagia courses in speech-language pathology graduate programs and has been updated with a new organizational scheme, as well as new and revised content throughout. This new edition of the workbook reflects these changes and includes a new PluralPlus companion website with multimedia content unique to the workbook, such as exam questions for instructors and case study examples for students. Based on Dr. Julie Barkmeier-Kraemer's experience teaching and training graduate students and colleagues in the area of dysphagia, a variety of activities and questions are included in the workbook that facilitate understanding and

because it is the most like Earth of the planets in the solar system and the place where the first detection of extraterrestrial life seems most likely to be made. The failures in 1999 of two NASA missions-Mars Climate Orbiter and Mars Polar Lander-caused the space agency's program of Mars exploration to be systematically rethought, both technologically and scientifically. A new Mars Exploration Program plan (summarized in Appendix A) was announced in October 2000. The Committee on Planetary and Lunar Exploration (COMPLEX), a standing committee of the Space Studies Board of the National Research Council, was asked to examine the scientific content of this new program. This goals of this report are the following: -Review the state of knowledge of the planet Mars, with special emphasis on
