Volkswagens are some of the most iconic and easily recognizable cars on the road, and The Complete Book of Classic Volkswagens is your definitive visual encyclopedia. The classic air-cooled Volkswagen Beetle, officially the Volkswagen Type 1, is regarded as one of the most important and well-engineered vehicles of the twentieth century. It was the most popular imported car in America in the 1960s, and before that it enjoyed a humble beginning as "the people's car" in its native Germany. The Complete Book of Classic Volkswagens encompasses the evolution of the popular Beetle as well as other variations of Volkswagen's air-cooled cars, vans, and trucks. Thoroughly illustrated, this is an invaluable reference to Volkswagen's collectible and iconic cars. The history of VW automobiles is just as colorful as the hues they were manufactured in, and this book illustrates the full story. German automakers originally sought to supply their countrymen with an automobile that was easy to mass produce. By 1938, they finalized the design for the VW "Bug"--the first rear-engined, rear-wheel-drive configured car. In its heyday, the rounded Beetle was produced at a rate of more than one million per year. Today, with more than 23 million cars built, the Beetle holds the record as the most-produced passenger car of all time. But the Beetle is only one part of The Complete Book of Classic Volkswagens. The rest--from Type 2 vans, pick-ups, and campers to the Type 113 "Super Beetle"--is included here. If you're the owner of a Volkswagen or if you just love their iconic look and you're interested in their evolution, this book deserves a place on your bookshelf.

A guide to effective word-of-mouth marketing presents case stories of companies that successfully used "buzz marketing" practices to break into ad-saturated markets, identifying six variants of word-of-mouth marketing that can be implemented without large advertising budgets. 40,000 first printing.

Seminar paper from the year 2005 in the subject Business economics - Miscellaneous, grade: 1.0, Robert Gordon University Aberdeen, 13 entries in the bibliography, language: English, abstract: The automobile industry is a very dynamic and exciting example of the development of new products. Against the background of the legendary Beetle, who sold over 21.6 million times, Volkswagen decided to build a new, modern version of the car. The target market for the New Beetle was defined as the Baby Boomers and the Young Generation which declares a main difference between the two cars. As the old one was a car for the people, the new one was for the chosen people who earn enough money. With total costs of \$ 590 million the product development process ended in 1998 when the car was launched to the American market first. It met with success there but costumers in Europe reacted differently when it was introduced a few months later. The unique design of a fun car was not the main attraction for Europeans to buy the car and the price was not accepted over here as in America. But accompanied by a huge marketing strategy, with the main goal of arousing emotions, Volkswagen achieved their objectives altogether. Volkswagen sold over 600,000 New Beetles from 1998 to 2003 and raised the brand awareness at the same time. Due to the crisis on the automotive market at the moment and the market caution I would recommend Volkswagen reconsider the price level of the car and they may be able to achieve higher sales outside America.
