peer. The volume you hold in your hands is Graham's timeless guide to interpreting and understanding financial statements. It has long been out of print, but now joins Graham's other masterpieces, *The Intelligent Investor* and *Security Analysis*, as the three priceless keys to understanding Graham and value investing. The advice he offers in this book is as useful and prescient today as it was sixty years ago. As he writes in the preface, "if you have precise information as to a company's present financial position and its past earnings record, you are better equipped to gauge its future possibilities. And this is the essential function and value of security analysis." Written just three years after his landmark *Security Analysis*, *The Interpretation of Financial Statements* gets to the heart of the master's ideas on value investing in astonishingly few pages. Readers will learn to analyze a company's balance sheets and income statements and arrive at a true understanding of its financial position and earnings record. Graham provides simple tests any reader can apply to determine the financial health and well-being of any company. This volume is an exact text replica of the first edition of *The Interpretation of Financial Statements*, published by Harper & Brothers in 1937. Graham's original language has been restored, and readers can be assured that every idea and technique presented here appears exactly as Graham intended. Highly practical and accessible, it is an essential guide for all business people--and makes the perfect companion volume to Graham's investment masterpiece *The Intelligent Investor*.

Business Analysis and Valuation has been developed specifically for students undertaking accounting Valuation subjects. With a significant number of case studies exploring various issues in this field, including a running chapter example, it offers a practical and in-depth

approach. This second edition of the Palepu text has been revitalised with all new Australian content in parts 1-3, making this edition predominantly local, while still retaining a selection of the much admired and rigorous Harvard case studies in part 4. Retaining the same author team, this new edition presents the field of valuation accounting in the Australian context in a clear, logical and thorough manner.

The book provides a comprehensive coverage of the course-content requirements of the students appearing in the paper ' Management Accounting ' at the MBA and MCom Examinations of different Indian Universities and those of professional institutions. The book has been divided into Five Convenient Sections. Each Section covers a different aspect of ' Management Accounting ' with the subject divided into chapters covering different topics in a systematic and concise manner. The unique features of this book lie in its simple and systematic presentation of theory, which would enable the students to solve practical problems with ease. The other main strengths of this book are: plentiful illustrative examples and end-of-the-chapter exercises with answers. New in this Edition • Updated position regarding IFRSs and steps for their convergence in India • Two new chapters, namely: ' Human Resource Accounting ' and ' Innovative Concepts ' in Section II of the book • Section V, relating to Case Problems, to make the study of the subject more interesting and a real value addition to the knowledge of the reader

Now readers can learn how to conduct financial statement analysis most effectively by performing analyses on real-world companies. Wahlen/Baginski/Bradshaw's FINANCIAL
