Welcome to the world of drones! This book will show you everything you could ever want to know about buying and flying your first drones. From getting to grips with the jargon you'll need to speak to other flyers, to how you can design and build your own drone with advanced features like live video feedback and programmable autopilot. You'll even learn how to read a sectional chart (that's a pilot's map-see, you're learning already!) This book is your gateway to the fun (and the learning) that awaits, and it'll keep you safe in the skies too.

Les Marees Terrestres

If you are a robot enthusiast who wants to quickly get the most out of Lego Mindstorms EV3, this is the book for you. Prior programming experience is useful to get the most out of this book, but not necessary.

This book details what it takes for an entrepreneur to be successful in today's high risk, high tech industry. Tips on how to get started, the potential pitfalls to avoid and many more, are offered in this book. The first three chapters of the book covered the greatest boom and bust story in history, a story of greed, hope and fear. These chapters provide information on what went wrong and why and cover some of the mistakes made by established technopreneurs and

the lessons we can learn from them. The other chapters cover practical topics like the challenging opportunities that can be found in the technology sector, de-mystifying technology, writing a business plan and how to raise capital.

The book offers advice to ridiculed/bullied kids and teens, based on the author's experience as a target. The author sympathizes with ridiculed young people, explains why certain people are harassed, and provides self-defense strategies. The message to bullied kids is that there's nothing wrong with them.
