The new edition of this popular book provides a step-by-step guide on how to use financial management and budgeting tools in the public sector. The book features a practical, case-study approach, and includes plentiful exercises and examples. It is designed as a textbook for courses on public financial management or public budgeting that focus on the application of budgeting and financial management tools. Public service professionals will also benefit from this handy primer.

The impact of the global financial crisis on government funds has been significant, with squeezed budgets having to satisfy ever-increasing demands for public services. Managers working in the public sector are confronted daily with targets and demands that are often set in confusing accounting and financial language. In Financial Management and Accounting in the Public Sector, Gary Bandy employs a clear and concise narrative to introduce the core concepts of accounting and financial management in the public sector and how to deliver services that represent value for money. This second edition has been revised and updated throughout, offering: an increased focus on post-crisis austerity more international examples of public financial management greater coverage of governance, accountability and risk management With a glossary of terms to help managers understand and be understood by accountants, as well as learning objectives, case studies and discussion questions, this practical textbook will help students of public management and administration to understand the financial and accounting aspects of managing public services.

This standard specifies the technical requirements for pollutant emission control of the stage IV non-road diesel mobile machinery, the diesel engine it is equipped with, as well as the second diesel engine installed in the vehicle for carrying people (cargo) on the road.

Ideal for students, entry-level technicians, and experienced professionals, the fully updated Sixth Edition of MEDIUM/HEAVY DUTY TRUCK ENGINES, FUEL & COMPUTERIZED MANAGEMENT SYSTEMS is the most comprehensive guide to highway diesel engines and their management systems available today. The new edition features expanded coverage of natural gas (NG) fuel systems, after-treatment diagnostics, and drive systems that rely on electric traction motors (including hybrid, fuel cell, and all-electric). Three new chapters address electric powertrain technology, and a new, dedicated chapter on the Connected Truck addresses telematics, ELDs, and cybersecurity. This user-friendly, full-color resource covers the full range of commercial vehicle powertrains, from light- to heavy-duty, and includes transit bus drive systems. Set apart from any other book on the market by its emphasis on the modern multiplexed chassis, this practical, wide-ranging guide helps students prepare for career success in the dynamic field of diesel engine and commercial vehicle service and repair. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

From hand-held, dedicated units to software that turns PCs and Palm Pilots into powerful diagnostic scanners, auto enthusiasts today have a variety of methods available to make use of on-board diagnostic systems. And not only can they be used to diagnose operational faults, they can be used as low-budget data acquisition systems and dynamometers, so you can maximize your vehicle's performance. Beginning with why scanners are needed to work effectively on modern cars, this book teaches you how to choose the right scanner for your application, how to use the tool, and what each code means. "How To Use Automotive Diagnostic Scanners" is illustrated with photos and diagrams to help you understand OBD-I and OBD-II systems (including CAN) and the scanners that read the information they record. Also included is a comprehensive list of codes and what they mean. From catalytic converters and O2 sensors to emissions and automotive detective work, this is the complete reference for keeping your vehicle EPA-compliant and on the road!
