Difficulty controlling and moderating one's emotional reactions. Emotional dysregulation (ED) is a term used in the mental health community that refers to emotional responses that are poorly modulated and do not lie within the accepted range of emotive response. Emotional dysregulation can be associated with an experience of early psychological trauma, brain injury, or chronic maltreatment (such as child abuse, child neglect, or institutional neglect/abuse), and associated disorders such ...

Emotional dysregulation - Wikipedia

The journal *Frontiers in Neuroscience* reported in 2018 that the poor function of the vagus nerve can lead to mood and anxiety disorders. In some cases, it is possible to stimulate the vagus nerve by improving your gut health. The increase in vagal tone can also help regulate stress and alleviate anxious feelings. Vagus nerve affects your gut health

Protein plays a vital role in regulating the concentrations of acids and bases in your blood and other bodily fluids (16, 17).The balance between acids and bases is measured using the pH scale.

9 Important Functions of Protein in Your Body

Executive function and self-regulation skills are the mental processes that enable us to plan, focus attention, remember instructions, and juggle multiple tasks successfully. Just as an air traffic control system at a busy airport safely manages the arrivals and departures of many aircraft on multiple runways, the brain needs this skill set to filter distractions, prioritize tasks, set and ...

Executive Function & Self-Regulation

The distributive function. Virtually everything that a government does has some effect on the distribution of income or wealth at the various levels of society. Improvements in health care facilities benefit the sick, the old, and those about to have children. An increase in taxes on tobacco and beer affects the poor disproportionately, while an increase in capital taxes similarly affects the rich.

Government economic policy - The distributive function ...

Regulatory reforms, such as the separation of regulatory and operational functions of port authorities, are necessary if the Philippines is to address the inefficiency and lack of international competitiveness of its ports, according to an analysis by state think tank Philippine Institute for Development Studies (PIDS). In his policy note titled "Regulatory Challenges of the [...]"
