The metaphor of the palimpsest has been increasingly invoked to conceptualize cities with deep, living pasts. This volume seeks to think through, and beyond, the logic of the palimpsest, asking whether this fashionable trope slyly forces us to see contradiction where local inhabitants saw (and see) none, to impose distinctions that satisfy our own assumptions about historical periodization and cultural practice, but which bear little relation to the experience of ancient, medieval or early modern persons. Spanning the period from Constantine’s foundation of a New Rome in the fourth century to the contemporary aftermath of the Lebanese civil war, this book integrates perspectives from scholars typically separated by the disciplinary boundaries of late antique, Islamic, medieval, Byzantine, Ottoman and modern Middle Eastern studies, but whose work is united by their study of a region characterized by resilience rather than rupture. The volume includes an introduction and eighteen contributions from historians, archaeologists and art historians who explore the historical and cultural complexity of eastern Mediterranean cities. The authors highlight the effects of the multiple antiquities imagined and experienced by persons and groups who for generations made these cities home, and also by travelers and other observers who passed through them. The independent case studies are bound together by a shared concern to understand the many ways in which the cities’ pasts live on in their presents.

Exploring Ancient Skies brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope. The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean, the Far East, and the New World (particularly Mesoamerica), putting the ancient astronomical materials into their archaeological and cultural contexts. The authors begin with an overview of the field and proceed to essential aspects of naked-eye astronomy, followed by an examination of specific cultures. The book concludes by taking into account the purposes of ancient astronomy: astrology, navigation, calendar regulation, and (not least) the understanding of our place and role in the universe. Skies are recreated to display critical events as they would have appeared to ancient observers - events such as the supernova of 1054, the ‘lion horscope’ or the ‘Star of Bethlehem.’ Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation. It will be useful as a reference for scholars and students in both astronomy and archaeology, and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history.

In Friedrich Dürrenmatt’s experimental thriller The Assignment, the wife of a psychiatrist has been raped and killed near a desert ruin in North Africa. Her husband hires a woman named F. to reconstruct the unsolved crime in a documentary film. F. is soon unwittingly thrust into a paranoid world of international espionage where everyone is watched—including the watchers. After discovering a recent photograph of the supposed murder victim happily reunited with her husband, F. becomes trapped in an apocalyptic landscape riddled with political intrigue, crimes of mistaken identity, and terrorism. F.’s labyrinthine quest for the truth is Dürrenmatt’s fictionalized warning against the dangers of a technologically advanced society that turns everyday life into one of constant scrutiny. Joel Agee’s elegant translation will introduce a fresh generation of English-speaking readers to one of European literature’s masters of language, suspense, and dystopia. “The narrative is accelerated from the start. . . . As the novella builds to its horripilating climax, we realize the extent to which all values have thereby been inverted. The Assignment is a parable of hell for an age consumed by images.”—New York Times Book Review “His most ambitious book . . . dark and devious . . . almost obsessively drawn to mankind’s most fiendish crimes.”—Chicago Tribune “A tour-de-force . . . mesmerizing.”—Village Voice

A richly-illustrated and important book that traces the rise and fall of one of the ancient world’s largest and richest empires.
