Enlightenment, was adopted or creatively transformed by Chinese universities. In addition to examining the influence of Western universities' visions, curricula, institutions and experiences on Chinese higher education, this volume attempts to show the degree of success achieved by Chinese universities in delivering the goals of personal emancipation, broad-based education, freedom of teaching and learning, academic professionalism, etc. that their Western counterparts had endeavored to attain in the last centuries.

texts illustrates how to arrive at the epiphanic Zen awakening known as satori. The essential initiatory experience of Zen, satori is believed to open up the direct perception of things as they are. "Even if you sit until your seat breaks through, even if you persevere mindless of fatigue, even if you are a person of lofty deeds and pure behavior, if you haven't reached this realm of satori, you still can't get out of the prison of the world."

Deliberately cultivated and employed to awaken the dormant potency of the mind, satori is said to be accessible to all people, transcending time, history, culture, race, gender, and personality. Attributed to the thirteenth-century Zen Master

Keizan (1268-1325), Transmission of Light (along with The Blue Cliff Record and The Gateless Barrier ) is one of three essential koan texts used by Zen students. Techniques for reaching the enlightening experience of satori are revealed through fifty-three short tales about the awakenings of successive generations of masters, beginning with the twelfth-century Zen master Ejo, dharma heir to Dogen. The translator's introduction establishes the context for Transmission of Light within the Zen canon and elucidates central themes of the work, including the essential idea that genuine satori "is not the end of Zen; it is more properly the true beginning."

A provocative reassessment of the concept of an American golden age of European-born reason and intellectual curiosity in the years following the Revolutionary War. The accepted myth of the “American Enlightenment” suggests that the rejection of monarchy and establishment of a new republic in the United States in the eighteenth century was the realization of utopian philosophies born in the intellectual salons of Europe and radiating outward to the New World. In this revelatory work, Stanford historian Caroline Winterer argues that a national mythology of a unitary, patriotic era of enlightenment in America was created during the Cold War to act as a shield against the

threat of totalitarianism, and that Americans followed many paths toward political, religious, scientific, and artistic enlightenment in the 1700s that were influenced by European models in more complex ways than commonly thought. Winterer's book strips away our modern inventions of the American national past, exploring which of our ideas and ideals are truly rooted in the eighteenth century and which are inventions and mystifications of more recent times.

Cultural landscape during the Republican period? "Modern art for a modern China" was the rallying cry of Chinese intellectuals, many of whom were artists, critics, writers, poets and educators. Wang describes how these groups discussed and implanted changes in China's conception and practice of art. She demonstrates how art reforms fit into the many initiatives for social and cultural change that contributed to the New Cultural Movement that transformed the Chinese cultural landscape during the Republican period. In doing so, she analyses two key areas in the intellectual history of Republican China: China's art reform in the early decades of the twentieth century;

have compiled this anthology since which includes earlier recognitions of common values and past considerations of questions which often remain pertinent nowadays. During the Enlightenment, many men and women of letters envisaged the continent's future in particular when stressing their hope that peace could be secured in Europe. The texts gathered here, and signed by major thinkers of the time (Rousseau, Montesquieu, Voltaire, Kant, Hume or Staël for instance), as well as by writers history has forgotten, present the reflections, with a couple of chronological extensions (from Sully to Victor Hugo) of authors from the long eighteenth century—the French Empire and

The fall of Napoleon generated numerous upheavals—on Europe, its history, its diversity, but also on what the nations, which, in all their diversity, make up a geographical unit, have in common. They show the historical origins of the project of a European union, the desire to consolidate the continent's ties to the Maghreb or to Turkey, the importance granted to commerce and the worries engendered by history's convulsions, but also the hope vested in future generations. The Idea of Europe follows its sister edition in French, *L'idée de l'Europe au Siècle des Lumières*, also published by Open Book.

This book seeks to highlight the influence of the Enlightenment idea of social progress on the character of the "civilising mission" in early Australia by tracing its presence in the various "civilising" attempts undertaken between 1788 and 1850. It also represents an attempt to marry the history of the British Enlightenment and the history of settler-Aboriginal interactions. The chronological structure of the book, as well as the breadth of its content, will facilitate the readers' understanding of the evolution of "civilising attempts" and their

This complete translation of the original collection of sermons, dialogues, and anecdotes of Huang Po, the illustrious Chinese master of the Tang Dynasty, allows the Western reader to gain an understanding of Zen from the original source, one of the key works in its teachings; it also offers deep and often startling insights into the rich treasures of Eastern thought. Nowhere is the use of paradox in Zen illustrated better than in the teaching of Huang Po, who shows how the experience of intuitive knowledge

that reveals to a man what he is cannot be communicated by words. With the help of these paradoxes, beautifully and simply presented in this collection, Huang Po could set his disciples on the right path. It is in this fashion that the Zen master leads his listener into truth, often by a single phrase designed to destroy his particular demon of ignorance.
