engine doesn't get fuel. It works perfectly under 2500 rpm and above 3000 rpm. We have worked on different things with the volvo engineers without results.

I have a Volvo Penta KAD 44 marine engine. I have problems ...

For long-term storage, fill the tank, and for periods of more than three months, you might want to consider a fuel stabilizer. If so, make sure to run the boat long enough to get the treated gas into the engine as well. Older tanks might have debris at the bottom, which can get stirred up as the fuel level drops.
