exams—resulting in better performance in the course—and provides educators a dynamic set of tools for gauging individual and class progress.

Discusses the current status of European marketing, offers strategies for the European Community and post-communist Eastern Europe, and examines the future of European marketing

Tuscany is a landscape whose cultural construction is complicated and multi-layered. It is this very complexity that this book seeks to untangle. By revealing hidden histories, we learn how food, landscape and architecture are intertwined, as well as the extent to which Italian design and contemporary consumption patterns form a legacy that draws upon the Romantic longings of a century before. In the process, this book reveals the extent to which Tuscany has been constructed by Anglos — and what has been distorted, idealized and even overlooked in the process.

Large marine protected areas (MPAs) have emerged since the mid-2000s as a popular state response to the overfishing, land run-off, and climate change causing the decline of the world's oceans. As of 2020, there were more than 14,000 MPAs in the world, most of them small, poorly managed, and often amounting to little more than "paper parks" that contribute little to ocean conservation or resource management. However, that is beginning to change. In recent years, governments, including the United States and United Kingdom, have turned their attention to protecting large swaths of ocean through MPAs hundreds of thousands of square kilometers in size. In this book, Justin Alger documents the efforts of activists and states to increase the pace and scale of global ocean protections, leading to a paradigm shift in how states conserve marine biodiversity. Through an analysis of domestic political economies, and based on three original MPA case studies located in the United States, Australia, and Palau, this book explains how states have protected millions of square kilometers of ocean space while remaining highly responsive to the interests of businesses. From the commercial fishing to ecotourism sectors, business heavily influences conservation policy, occasionally leading to robust protections but more often than not to business-as-usual activity on the water. Conserving the Oceans examines the reach and the limits of business influence, examining how the domestic political economy of a given ocean space can reshape a global norm to better suit local economic realities. While recognizing important global progress and growing ambition to conserve ocean ecosystems, Alger provides a critical analysis of the processes by which global environmental norms become domestic policy. Ultimately, the book questions if we are still doing too little to prevent the worst impacts of the global environmental crisis despite the paradigm shift in global ocean conservation.

"Great retailers are great at service. No exceptions. This book offers a wealth of insight into delivering excellent retail service." ---Leonard L. Berry, Distinguished Professor of Marketing, N.B Zale Chair in Retailing and Market Leadership, Mays Business School, Texas A&M University "With a growing understanding of service as a phenomenon and perspective of business and marketing, retailers are increasingly seeing the need to transform from distribution of products to service providers. This book includes considerable insight regarding the importance of the service perspective and how it can be implemented in retailing." --Christian Grönroos, Professor of Service and Relationship Marketing, CERS Centre for Relationship Marketing and Service Management, Hanken School of Economics, Finland "Consisting of chapters written by leading scholars in service management and retailing from around the world, this comprehensive book offers rich insights for how retailers can excel and achieve sustainable competitive advantage by invoking and implementing service management principles. This enlightening book is a valuable resource for students, researchers and practitioners with an interest in retailing." --A. "Parsu" Parasuraman, Professor of Marketing & The James W. McLamore Chair, School of Business Administration, University of Miami Coral Gables, Florida "Service excellence and service innovation are critical for success in today's competitive retail marketplace. Service Management: The New Paradigm in Retailing provides a contemporary and transformative lens for accomplishing these essential goals." --Mary Jo Bitner, Professor, Director Center for Services Leadership, W.P. Carey School of Business, Arizona State University

This book addresses the problem of inferring the state of the ocean circulation, from a mathematical perspective.

This volume contains approximately twelve thousand entries with information on the history & origin of Manitoba geographical names, for both populated areas and natural features. Entries include a National Topographic System map reference to indicate the approximate location.
